

Bring Order to AI

Clairret is a Strategic AI Transformation Platform designed to turn AI from a costly technology into a driver of business transformation. Clairret combines strategic outcome measurement, workforce readiness, and automated risk guardrails — in one platform.

A MARKET REALITY CHECK

Hype, not strategy, is driving AI adoption — and organizations are paying for it. Enterprises are launching AI initiatives without clear outcomes, enabled users, or necessary guardrails. The result is predictable: budgets wasted, sensitive data leaks, and productivity lost to work that has to be redone.

56%

report **zero revenue or cost benefit from AI** in the last year.

PWC CEO SURVEY 2026

19%

slower output for developers actively using AI tools.

UPLEVEL 2024

12%

of employees report **receiving sufficient AI training**.

EY WORK REIMAGINED 2025

This isn't an adoption problem. It's a strategy problem.

HOW WE BRING ORDER TO AI

The problem isn't AI. It's the absence of structure around it. Clairret gives organizations tools and structure to adopt AI with intention in one platform. So organizations can act with purpose, not reactively.

01

Strategy

Every initiative owned, measured, and visible.

02

Guardrails

Automate risk, policy, and oversight.

03

Idea Marketplace

Leadership sets direction. Teams propose the path.

04

Readiness

Role-based training tied to real initiatives.

The strategy problem has a structural answer.

01 — STRATEGY

Every initiative owned, measured, and visible.

No orphaned projects, no invisible spend — every initiative tracked from approval to outcome.

INITIATIVE	Q1	Q2	Q3	Q4
Customer Service - Troubleshooting			Q3 - Q4 2026	
	Planned	Quick Win		
Datasheet Production Agentic Chain		Q1 - Q2 2026		
	Planned	Quick Win		

DATA & TRAINING

To establish baseline accuracy, we will export the last 12 months of ticket transcripts - including names, email addresses, and account IDs - and fine-tune a third-party model on the raw export

 **POLICY VIOLATION**

High Risk

02 — GUARDRAILS

Automate risk, policy, and oversight.

Policy Wizard defines what's permitted and who decides. Every request automatically scored for risk before the AI Council approves.

03 — IDEA MARKETPLACE

Leadership sets direction. Teams propose the path.

Calls for Proposals connect priorities to ground-level ideas — every submission defines an owner, a baseline, and success metrics.

Safe & Responsible Use of AI

 38%

 Knowledge check - Q2

Which of the following best describes an AI “hallucination”?

A When the AI system crashes or experiences downtime.

B When the AI confidently generates false, inaccurate, or fabricated information.

04 — READINESS

Role-based training tied to real initiatives.

Training connected to the initiatives already in flight — not generic courses, but learning built around the work.
